

every registration precedes its result (*the control's single joint commit; re-executed later)

● runs 1-2: units, first evaluation

○● runs 3-4: suppressed pairs,
exposed vocabulary (thesis closed)

● positive control* (Science4Cast)

● run 5: author space (19-24 percent)

● run 6: exposed pairs, author space (23 percent)

● run 7: bridging as a trait (not found)

● placebo and sensitivity checks:
the author-space rate fails

○ registration committed

● result committed

● run 8: permutation criterion
(floor everywhere; z at or below -9)
